POE

On part 1 i fix the websites because it was have a style on it. there is no GitHub link part 1

1 current analysis- improved

- expanded the analysis of the existing situation

- added more detail about the organisations current website needs and the problems the proposed website aims to address.

2 design aesthetic - added

- developed a consistent visual design for website

- added a consistent colour scheme, typography, navigation styling , buttons logo and footer

- . Created an external CSS stylesheet to provide consistent styling across all pages.

3 wireframes- improved

- improved the websites layout planning by showing the main sections and navigation structure.

- the sitemap and page structure were also developed to show how users can move between pages.

4 website features and functionality- improved

- added clearer descriptions of the proposed websites features

- included pages such as home, products, enquiry, about and contact

- added product images , navigation links, enquiry forms and contact information

5 technical requirements-added

- Specified the technologies used for the website: HTML5, CSS3
- Created an organised project structure containing html pages, an external CSS file and images
- Added responsive CSS using media queries so the website can adapt to smaller screens.
